

Non-Recursive InOrder Traversal

Day 169
26/Dec/25

The Non-Recursive version of InOrder traversal is similar to PreOrder. The only change is, instead of processing the node before going to left subtree, process it after popping (which is indicated after completion of left subtree processing)

Idea

- ① Go left as much as possible
- ② Use stack to remember nodes
- ③ When null $\rightarrow$ process node $\rightarrow$ go right

```
public static void inorder (TreeNode root) {
```

```
    Stack<TreeNode> st = new Stack<>();
```

```
    TreeNode cur = root;
```

```
    while (cur != null || !st.isEmpty()) {
```

```
        while (cur != null) {
```

```
            st.push(cur);
```

```
            cur = cur.left;
```

```
        }
```

```
        cur = st.pop();
```

```
        System.out.print(cur.data + " ");
```

```
        cur = cur.right;
```

```
    }
```

```
}
```

$cur \neq \text{Null}$
Stack is Empty

$cur \neq \text{Null}$

$cur \neq \text{Null}$

$cur \neq \text{Null}$

$cur.left = \text{Null}$

Now pop the stack

$cur = \text{st.pop}()$

Inorder

4	
---	--

$cur == \text{Null}$

$cur = cur.right = \text{Null}$

$cur \neq \text{Null}$

$cur = st.pop()$

Inorder

4	2	
---	---	--

$cur = cur.right$

$cur \neq \text{Null}$

$cur == \text{Null}$
 $cur = cur.left$
 $cur = \text{Null}$

$cur == \text{Null}$
 $cur = cur.left$
 $cur = \text{Null}$

Inorder

4	2	5
---	---	---

$cur = st.pop()$

$cur = 1$

$cur \neq \text{Null}$

Inorder

4	2	5	1
---	---	---	---

$cur = st.pop()$

$cur = 1$

$cur = cur.right$

Inorder

4	2	5	1
---	---	---	---

3

cur = st.pop()

cur = 1

cur = cur.right

Inorder

4	2	5	1	6
---	---	---	---	---

6
3

cur = st.pop()

cur = 3.left

cur = cur.right

cur = 6

6.left = null

6.right = null

Inorder

4	2	5	1	6	3
---	---	---	---	---	---

3

cur = st.pop()

cur = 3.right

cur = 7

Inorder

4	2	5	1	6	3	7
---	---	---	---	---	---	---

7

cur = st.pop()

cur = null

Bcz cur.left & cur.right = null

7

Empty

Loop Breaks $cur = null$ & stack is empty

Time Complexity $O(n)$ Space Complexity $O(n)$
